# ☀ VALLEDELMARTA ☀

RESORT

**It is a hotel that combines luxury and comfort in a typical rural setting and the architecture of an agritourism, expression of a refined and innovative vision of hospitality, based on experiences and feelings that exceed the traditional concept of hotel accommodation.**

The union of elements such as stone, wood, water and respect for nature make Valle del Marta a unique place in many ways.

The beauty farm of Valle del Marta, divided into three areas (SPA, Wellness Centre and the Hado pool), is located in this ideal environment.

The beauty farm is a new concept, designed according to a philosophy of relaxation that extends to a psycho-physical wellbeing.

## #A OUR SPA ZONE

The small SPA zone at Valle del Marta is composed of two hot tubs, a relax zone with swinging beds, a sauna for two people, dressing rooms and showers. 2/3 couples at a time can enter it in order to make all customers relax in the best way possible.

Night entry to the SPA zone (only for couples): € 60

## #B THE WELLNESS CENTRE

Customers can enter this area only with our beauticians. There are some changing rooms inside. In the wellness centre, there are areas for beauty treatments, massages, a salt room, a sun room, Nuvola, and an emotional shower.

## #C HADO POOL

Located in another area, this pool, given its characteristics, is used for various purposes. Its water is a bit salty. Children may enter too. Although there is enough space for 10 people to swim inside the pool, Hado is usually employed for couples' relaxation.

# ☀ NUVOLA ☀

An innovative treatment completely relaxes your body and mind. The weightlessness sensation and the gentle abandonment in its warm water produce an intense relaxation that you have never felt before.

(20/30/40 min.)

## Treatment «Nuvola»:

€ 25

# ☀ SALT ROOM ☀

It is a bioarchitecture place, whose conception has very ancient origins. It is a room covered in sea salt. Inside it, you will feel a sensation of wellness, due to the colour and smell of salt. The beneficial properties of salt produce a pure microclimate with constant temperature and humidity. The salt can ionise the air, rebalance the presence of positive and negative ions. Through a chemical process, the air becomes healthier and there is scientific evidence that inhaling it can help contrast respiratory and skin diseases as it is a natural antibacterial agent.

A session in the room contributes to eliminate tensions. Several scientific studies carried out in Eastern Europe have shown that the effect produced by these treatments (about 30 minutes each) in the salt room has the same benefits of three days at the sea; in children and the elderly it helps to respiratory problems giving a sure benefit to deal better with the winter. The salt room does not have specific contraindications. (30 min)

## WATER DANCE

(water, music and stones)

Pure saline **WATER**;  
**MUSIC** with a particular frequency, spread through water;  
volcanic **STONES** typical of thermal zones (Paleo-Bolsena ignimbrite, ash-grey tuff stones already used by Etruscans).

Recent studies have demonstrated that water molecules acquire an ordered structure thanks to the above-mentioned elements; otherwise, their movement is disordered and chaotic. The physician Masaru Emoto and other scholars, like the 2008 Nobel prize for medicine Montagnier, believe that not only is water able to memorise sound waves, but it can also receive and transmit them with informative frequencies. The Hado pool has been created on the basis of these theories. 'Hado' is a Japanese word meaning 'top of the wave' or 'energy vibration' that gives a strong and healthy relaxation. In the Hado pool a specific treatment is carried out in order to prepare your body and mind to relax completely.

## WATER TREATMENTS

### Water foot reflexology:

€ 50

In addition to all the benefits of foot reflexology, the Hado pool massage adds the benefits of hot water which relaxes your body completely. After finishing the treatment, a powerful hydro-massage completes the muscular relaxation (foot reflexology duration: 30 min, overall duration: 60

**Hado pool (not exclusive) – price for person for 60 min:** € 20

**Exclusive Hado pool for couples – 60 min:** € 60

**Exclusive Hado pool for couples (night) – 60 min:** € 70

**Water dance - (30 + 30 min):** € 50

It is a unique relax program inside the Hado pool. It lasts for one hour and it is divided into two phases: the first is a kind of ritual aimed at creating, with the help of a beautician of ours, a deep relaxing intimacy with water. In the second phase, the music therapy spread through water, together with colour therapy and aromatherapy, generates the right atmosphere to relax your body and mind completely. Hado is a Japanese word meaning 'top of the wave.' This term denotes an extremely high energetic vibration which is at the basis of the pool's construction. The main characteristics of the Hado pool (built within the beauty farm) are: slightly salty water, a musical frequency directly transmitted under water and some volcanic stones typical of the local hot springs. Starting from the physician Masaru Emoto's scientific studies, bathing in this pool is thought to relax deeply and healthy.

In the end, the foot reflexology will complete your treatment, leaving a sensation of peaceful relaxation.

### Valle del Marta «over the top»:

♡ € 120

#### A feather in our cap.

It is composed by various techniques which form a psycho-physical sensorial journey: head massage, relaxing massage, foot reflexology and emotional shower.

It is a unique and revitalising experience: a two-hour intervention through a deep action between philosophy and manual skills, a rhythmic procedure that can restore every body part. It begins with a head massage which, thanks to an accurate relaxation of your skullcap, a scalp massage and acupressure on some Shiatsu points, helps to eliminate negative energies.

Then, a relaxing massage is given: perfumed oils will lead our beautician's slow but deep movements with the purpose of limbering up and relax your muscles to prepare them to foot reflexology, a technique based on Oriental theories according to which on our feet every organ and body part is reflected. The emotional shower with its colour therapy will conclude the program. (150 min)

# THALASSOTHERAPY

## Halo relax:

€ 50

## Total-body scrub with marine salt:

€ 100

This offer includes: salt room (30 min), total-body scrub with marine salt (50 min), entry to salted pool (30 min).

## Treatment with marine salt and mud:

€ 160

This offer includes four total-body treatments: marine salt scrub (50 min), marine mud (50 min), massage (30 min) and access to the salty pool at the end of the treatment (30 min). This program is surely the most complete. It gets together the effects of the classical thalassotherapy and those of the mud which, thanks to marine and vegetal essences, has draining effects – that is, it contributes to the elimination of excess fluids and toxins typical of cellulite, and stimulates the systemic circulation. (160 min)

## Marine algae relaxation:

€ 110

This offer includes: Algotherapy with marine seaweeds (50 min), access to the salty pool (30 min), and a relaxing massage with perfumed oil (30 min). After a hot shower, a relaxing massage with perfumed oil will give your body and mind strong wellness. (120 min)

## What is thalassotherapy?

'Thalassotherapy' comes from the Greek 'thalassa' (sea) and 'therapia' (cure). It is a combination of elements already employed by Romans, Greeks, Egyptians, and Phoenicians, who used marine water and products (algae and fungi) to stimulate, mineralise, relax and restore their organism.

## When can thalassotherapy help us?

Thalassotherapy has several positive effects: it increases our metabolism thanks to iodine that stimulates our organism and helps to burn fats; it improves systemic circulation thanks to the massage water gives you while walking through the pool; it strengthens our muscles by accelerating our bloodstream. Mud treatments and scrubs with salt smooth our skin and make it more compact and tonic. This treatment helps people with skin problems too.

## Whom is thalassotherapy useful to?

Thalassotherapy is generally recommended to adults and children, pregnant women, people affected by skin problems like psoriasis, dermatitis, eczema, erythema, or respiratory diseases like asthma and sinusitis. Nevertheless, it should be avoided by people who suffer from epilepsy or hysteria.
