SPA

The center is divided into four main areas: one with Jacuzzis, sauna and relaxation area, one with the Hado pool, one with two tubs for scented baths, and one with cabins for massages, Nuvola and the Salt Room.

HADO POOL

It is a special pool built from volcanic stones, typical of thermal areas (i.e., Paleo-Bolsena ignimbrites, ash-grey tuffaceous rocks already used by the Etruscans) and filled with pure saline water. A particular frequency of music is spread through the water.

Recent studies have demonstrated that water molecules follow an orderly movement, in spite of moving chaotically as they normally do, if stimulated by the elements mentioned above (i.e., volcanic stones and music). The Japanese physicist Masaru Emoto and many others (such as the 2008 Nobel prize Montagnier) argue that not only is water able to memorize, but also to receive and send back sound waves. Moving from these premises, the Hado pool (from the Japanese “crest of the wave” or “energetic vibration”) was built at Valle del Marta to make you feel a powerful sense of relaxation. Inside it you can receive exclusive treatments to relax your body and mind.

Hado is a Japanese word meaning “crest of the wave”. This term indicates the extreme fine energy vibration that lies behind the pool's creation. The Hado pool created inside the SPA has warm, slightly salted water, a musical frequency transmitted directly into the water and some volcanic stones typical of the thermal baths of the territory of Tuscia. From the interpretation of the scientific studies of the physicist Masaru Emoto, it is believed that bathing in water with such characteristics can create a strong and beneficial relaxation for both your body and mind.

Thanks to the special properties of the water, this pool is perfect for several treatments. Even small children can benefit from it. It can accommodate up to a maximum of 10 people, but it is mainly recommended as a romantic gateway.

HADO POOL

Exclusive couple access to the Hado pool (60 minutes): € 60,00

Exclusive couple night access to the Hado pool (60 minutes): € 80,00

“Water dance” inside the Hado pool (60 minutes): € 80,00

It is a unique 1-hour relaxing treatment inside the Hado pool. The treatment consists in two phases: the first is a sort of ritual, carried out with the help of the beautician, which is intended to make you familiarize with the aquatic environment and the absence of gravity. In the second phase, music therapy spread directly through the water, along with chromotherapy and aromatherapy, will create the right atmosphere for your complete relaxation. (30 minutes with the beautician + 30 minutes alone in the pool)

Water foot reflexology (60 minutes): € 80,00

The massage is carried out inside the Hado pool, combining the benefits of foot reflexology with those of hot water, thus creating a deep feeling of wellbeing for your body and mind. Once the treatment is over, the hydromassage will complete muscular relaxation. (30 minutes of reflexology + 30 minutes alone in the pool)

Water music therapy (60 minutes): € 80,00

This treatment aims to awaken both your body and mind, thus harmonizing them. With the help of the Hado pool, whose molecules are modified, Tibetan bells are put close to your chakra points, their sound creating strong vibrations able to revitalize your senses. The very moment you feel these vibrations, a pleasant relaxation takes away all the negativity you collected. (30-minute treatment with bells + 30 minutes alone in the pool)

Energy and vibrations (30 minutes): € 60,00

Regenerate yourself with the energy and vibrations of Tibetan bells. *“Vibration is the origin of all, vibration is sound, and sound is life.”* Tibetan bells, used since ancient times, played with wooden clappers, emit harmonic frequencies that stimulate your brain, and induce calm. The result of this treatment is a sense of calm that re-establishes your psychophysical balance. (The treatment is performed in the SPA)

NUVOLA (lit. «cloud»)

Nuvola treatment: € 25,00

It is an exclusive treatment that allows complete relaxation of your body and mind. The sensation of floating in zero gravity, the warmth of the water, and the enchanting effect of color therapy produce total relaxation. It is certainly an experience you have never tried before. The duration of this treatment can vary; it can last for 20,30 or 40 minutes.

EXCLUSIVE TREATMENTS

Valle del Marta "Top package":

€ 90,00

Two massages in one, with stones and foot reflexology (60 minutes).

Following the traditions of the American Indians, who used volcanic stones smoothed by rivers for their capacity of retaining heat and releasing it constantly, this treatment will help you to release tensions and abandon yourself to complete wellbeing. The foot reflexology practiced at the end completes this treatment, leaving you a deep feeling of relaxation.

Valle del Marta "Over the top":

€ 145,00

Our strong point.

Several techniques together make up a sensory journey of psychophysical wellbeing. Nuvola, head massage, relaxing body massage, foot reflexology.

It is a unique and regenerating experience, through actions that mix philosophy and manual skills. It is a rhythmic complex treatment able to regenerate every part of your body. It starts with Nuvola, to relax your muscles and prepare your body to the rest of the treatment. A head massage follows, which acts on your cranial nerves thanks to acupressure techniques and releases tensions. The relaxation deriving from this massage involves all the parts of your head and your chakra points, thus freeing them from negative energies, allowing their correct energetic alignment, and giving your body harmony and wellbeing.

A relaxing massage follows with scented oils, which accompanies the slow but deep movement of the beautician's hands to help loosen and relax all your muscles to prepare them for foot reflexology, a technique based on Eastern doctrines that treat the parts of the feet with nerve endings with stimulation and acupressure. These endings

Dry Brushing:

€ 90,00

This is a body scrub that has been practiced since ancient times and is still very popular among Hollywood stars and

in the most prestigious SPAs. It is carried out with the help of special brushes that are manually applied over your body with circular movements, thus allowing the removal of dead cells. The skin will be immediately smoother and detoxified. Moreover, the rotating movements will stimulate your microcirculation and the drainage of the tissues, promoting oxygenation and cellular renewal. (50 minutes)

Remodelling anti-cellulite treatment with Epsom salts:

€ 120,00

This treatment uses this extraordinary mineral, extracted in the English town of Epsom, in Surrey, from which it takes its name. Its chemical composition is magnesium sulphate, and this makes the salt act as a "repairer" of the annoying effects produced by cellulite. The treatment includes a 35-minute hot bath, so that the effect of salt decreases muscle tension. Moreover, if let dry naturally without rinsing with running water, the treatment increases the level of magnesium contained in your skin. Lastly, legs are wrapped in bandages

up to the lower part of your glutei and your face is dabbed with a warm cloth soaked in water and salt. After rinsing with cold water, your skin will be smoother and softer than ever. (90 minutes)

HALO THERAPY

Salt Room

€ 30,00

It is an area dedicated to bio-architecture, whose conception has very ancient origins. It is a room lined with sea salt. Inside it, you can feel a sense of wellbeing due to the color and smell of salt. The beneficial properties of this mineral produce a pure microclimate, which is then kept constant in temperature and humidity. Salt can ionize the air around you, rebalancing the presence of positive and negative ions. Through a chemical process, the air becomes healthier, and it is scientifically proven that inhaling it helps to fight many forms of respiratory and dermatological diseases, since salt is a natural antibacterial. Sitting in the room helps to reduce tension. Various scientific studies carried out in eastern Europe have shown that the effect produced by this 30-minute treatment inside the salt room brings the same benefits of three days at the sea. It helps to solve problems of your respiratory tract both in children and adults, helping your body to better face winter days. The salt room has no specific contraindications.

Reshaping anti-cellulite treatment with Epsom salts:

€ 120,00

Moreover, if let dry naturally without rinsing with running water, the treatment increases the level of magnesium contained in your skin. Lastly, legs are wrapped in bandages up to the lower part of your glutei and your face is dabbed with a warm cloth soaked in water and salt. After rinsing with cold water, your skin will be smoother and softer than ever. (90 minutes)

€ 190,00

This package includes four body treatments: sea salt scrub, sea mud, relaxing massage, and access to the Hado pool at the end of the treatment. This package is undoubtedly the most complete of its kind because the beneficial effects obtained with thalassotherapy are added to those of the mud, which has a powerful draining action, contributes to the elimination of excess fluids and toxins, and promotes venous and lymphatic circulation.

Seaweed relaxation (100 minutes):

€ 140,00

This package includes an algotherapy treatment, access to the Hado pool, and a relaxing massage with scented oil. The exfoliating effect that the saltwater produces on your skin, when sprayed through jets of hot air, prepares your body for the algotherapeutic treatment. A mixture of seaweed will be applied all over your body and left to penetrate in depth. Afterwards, a nice hot shower and a relaxing massage with scented oil will complete the treatment, giving you a feeling of extreme relaxation.

What is thalassotherapy?

The term "thalassotherapy" comes from Greek (thalassa=sea; therapia=cure). These elements are the basis of a long-standing practice known to the Egyptians, Phoenicians, Greeks, and Romans, who considered seawater and thermal baths an outstanding opportunity to benefit from unique properties and products such as algae and mud to stimulate, remineralize, relax, and regenerate the body.

Thalassotherapy has many therapeutic properties, e.g., it increases basal metabolism, thanks to the iodine that stimulates your body and helps to burn fat, it improves circulation thanks to the massage effect naturally produced by water, and strengthens your muscles, also speeding up the blood flow. The mud treatment and salt scrub help to smooth your skin, making it more compact and toned. Thalassotherapy also has considerable benefit to those who suffer from skin problems and diseases.

For whom is thalassotherapy useful?

Thalassotherapy is generally indicated for adults and children, even for pregnant women. In particular, it is indicated for those who suffer from skin diseases, such as psoriasis, dermatitis, eczema, and erythema, as well as respiratory diseases, asthma, sinusitis. Nevertheless, people affected by diseases of the nervous system, e.g., epilepsy and hysteria, should avoid this treatment.
